PROFILE

B.Tech/B.E student specializing in Artificial Intelligence and Machine Learning at BMS Institute of Technology, Bangalore. Demonstrates strong interest in leveraging AI and ML technologies to address real world challenges. Quick learner and effective team player committed to continuous skill enhancement and contributing to innovative solutions

SKILLS

• C/C++ • Machine learning • Python programming • HTML/CSS • JavaScript • React framework • API Integration • Artificial Intelligence • MongoDB/SQL

EDUCATION

BMS Institute of Technology Bengaluru

- Bachelor of Engineering in AIML
- Student Placement Coordinator
- CGPA: 9.2 (current)

Podar International School, Junagadh

- Class X: 91.6%
- Class XII: 89%

EXPERIENCE

Student Placement Coordinator at BMSIT, Bengaluru (current)

• Assisted students in completing applications, resumes, and cover letters.
• Advised students on how to maximize learning from their placement experiences.

PUBLICATIONS

- **Enhancing Question Answering Systems with Semantic Networks and NLP Techniques**—Presented at IEEE Conference on [COMP-SIF], [March, 2025]. (Co-author).
- **Improving Medical Imaging Diagnostics with Deep Convolutional Networks for Early Detection and Treatment**—Presented at IEEE Conference on [COMP-SIF], [March, 2025]. (Co-author).

CERTIFICATES

- The Complete Front-End Web Development, Udemy, 17 July 2024
- AWS APAC Solutions Architecture virtual experience program, Forage, August 2025 - Designed simple and scalable hosting architecture based on Elastic Beanstalk for a client experiencing significant growth and slow response times - Described proposed architecture in plain language, ensuring client understood how it works and how costs will be calculated
- Machine Learning for Engineering and science applications, NPTEL IITM, April 2025
